

# MAT222 Week 2 Discussion Grading Rubric

## Grading Criteria

MAT222 Discussion Week 2: One-Variable Compound Inequalities 4 points possible	
Content Criteria	Weight
Student thoroughly addresses all elements of the discussion prompt, and demonstrates an advanced knowledge of the topic. Student clearly understands the mathematical concepts in the assignment, and contains the prerequisite math knowledge to do the work successfully.	1.6 (40%)
Writing of Math Work	
Student effectively shows how the solution(s) was achieved. The math work is shown and follows an accurate process to get to the solution.	1.6 (40%)
Participation	
Student responds with thorough and constructive analysis to <b>at least two classmates</b> , relating the response to relevant course concepts. Student may pose pertinent follow-up thoughts or questions about the topic, and demonstrates respect for the diverse opinions of fellow learners. Initial post was made by <b>Day 3 (Thursday)</b> , and responses were made by <b>Day 7 (Monday)</b> .	0.4 (10%)
Writing	
Initial post contains very few, if any, minor errors related to grammar, spelling, and sentence structure. Post is easy to read and understand.	0.4 (10%)
Total Points	4
