

PSY650 Dealing With Wix.com

Go to the [Wix.com](https://www.wix.com) website to register for and begin creating your website. Be sure to watch the tutorials provided when you register to help you become acquainted with this website-building platform. If you experience any technical difficulties, please contact the [Wix.com technical support](#) directly. The technical support offered through your Student Portal will not be able to assist with this outside website. If, after you have reviewed the tutorials and contacted Wix.com technical support, you are still unable to utilize this platform to complete this assignment, please contact your instructor.

It is highly recommended that you complete all written work in a Word document first, and then copy and paste the required content into your web page. This will allow you to carefully edit your content prior to publishing it as well as save and retrieve your work should anything occur which causes the website to fail.

Refer to the [Wix Quick-Start Guide](#) to create your website as unsearchable. Although it will not be searchable to the general public, it will be available and viewable to anyone who is given your specific site link. Copy and paste the URL to your website into the forum for review by your instructor and peers. Once you have received your final grade for this course, you have the option of deleting this website through your account with Wix.com.
